## ∴ ABOUT LAKESHORE

Lakeshore is a generously proportioned soft seating series with bold lines and an emphasis on seating comfort. Its confident design is accentuated by a refined metal base. Lakeshore is available as a single, double or triple seater. A swiveling hide-away tablet arm is available on the single seater which has the characteristic proportions of a club chair. Lakeshore's bold clean design is versatile, and it fits well in prestigious environments.

- **FLEXIBILITY** -The basic design is modular. The arms, back and seat are built separately and fastened securely together after being upholstered. This makes the product much easier to ship and install as the pieces can be moved individually and assembled on site.

- **QUALITY/DURABILITY** -The upholstery features high density, high resiliency foam over elastic webbing on ¾" hardwood plywood frame. The base frame is finished with a high impact silver epoxy powder coat, electrostatically applied for corrosion resistance. The entire structure is built to exceed ANSI-BIFMA standards.

- **ENVIRONMENTAL SUSTAINABILITY** -Lakeshore's component materials are easily separated. The steel frame is recyclable. Foam is CFC free. Built to provide an extended useful lifespan.
